

Committee on Sustainable Working Group Governance.

Ryan Ruddick, Elisabetta D'Anastasio, Benjamin Mannel, Jose Antonio Tarrío Mosquera, Ashley Santiago, Allison Craddock, Felix Perosanz, Mayra Oyola-Merced* and Simon Banville*

Overview of the Committee

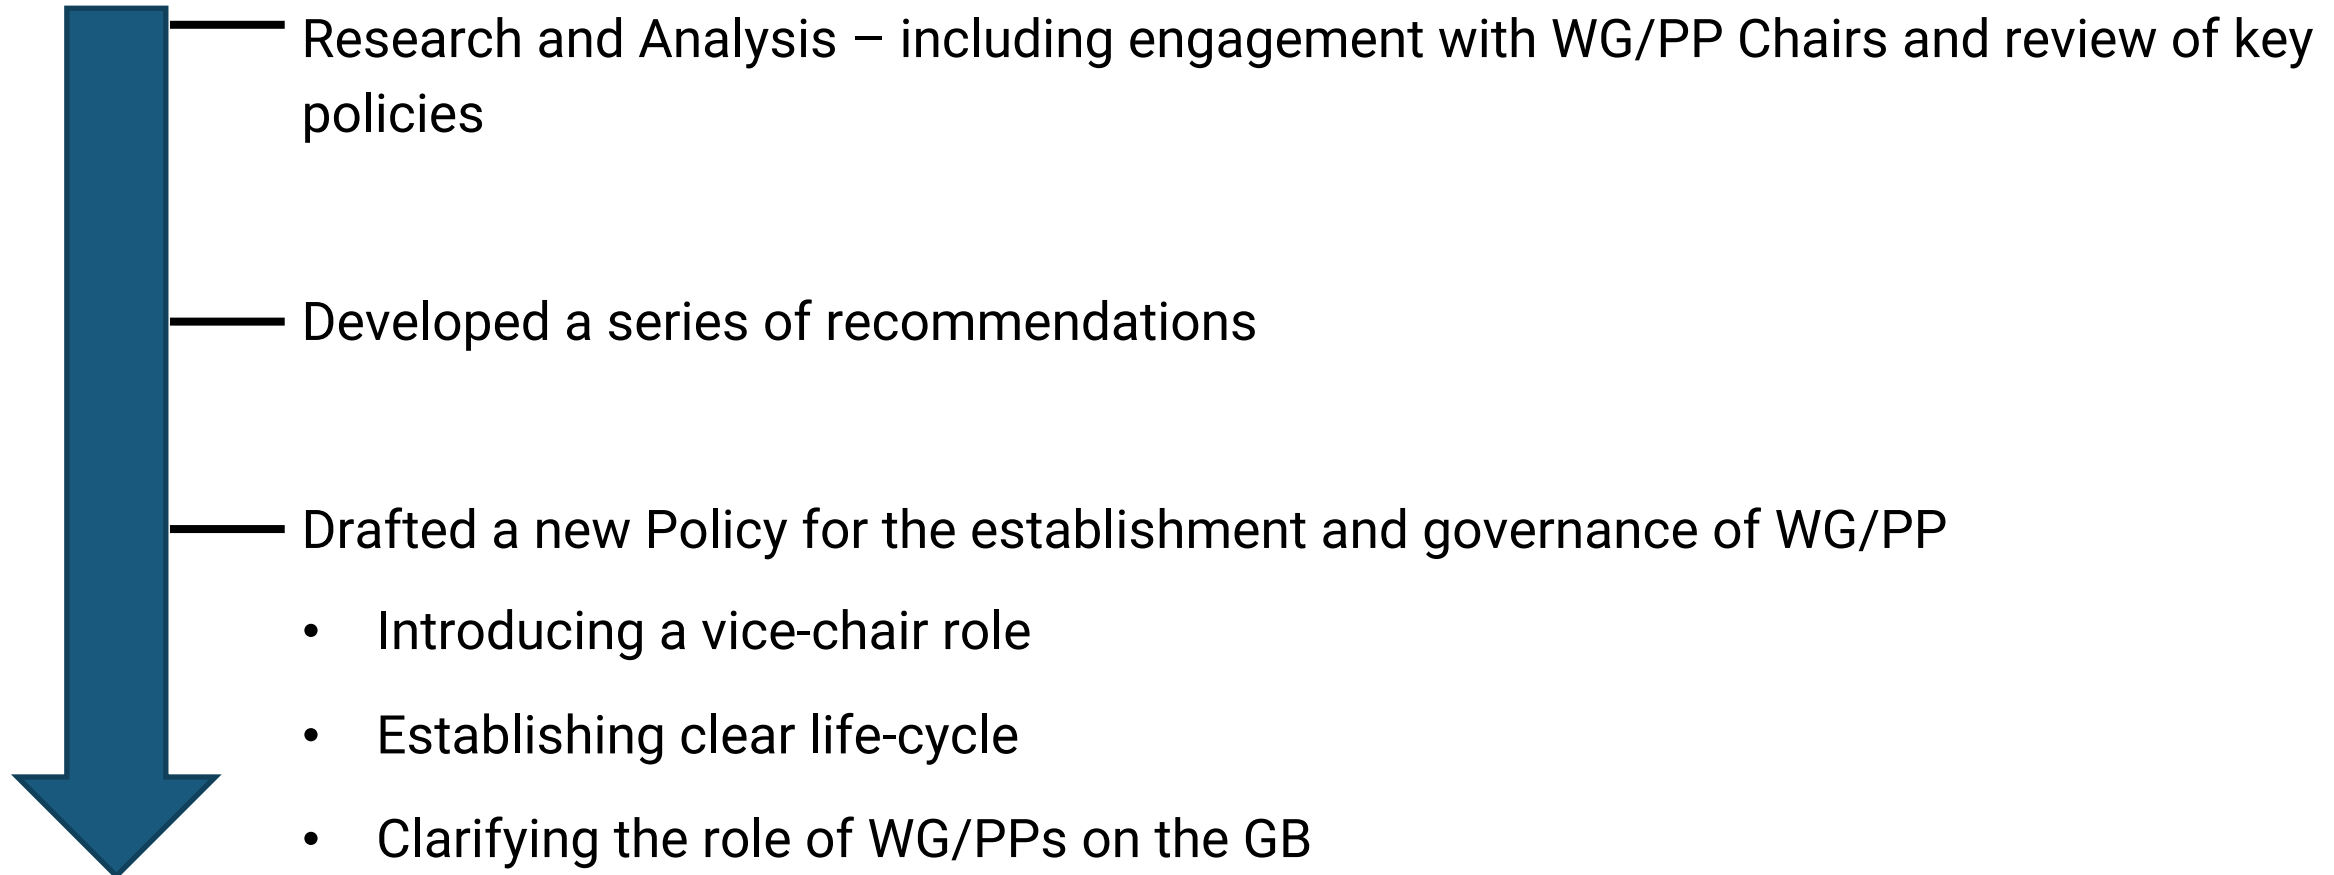

- Without active participation from our members the IGS is not sustainable.
- The CSWGG was established as an action from the 58th Governing Board meeting, with the goal to evaluate the current governance arrangements with the Working Groups, Pilot Projects, and Committees and suggest ways to invigorate participation. This aligns with the objectives of the IGS 2021+ Strategic Plan.

Recommendations

The CSWGG is focused on the Working Groups and Pilot Project and includes:

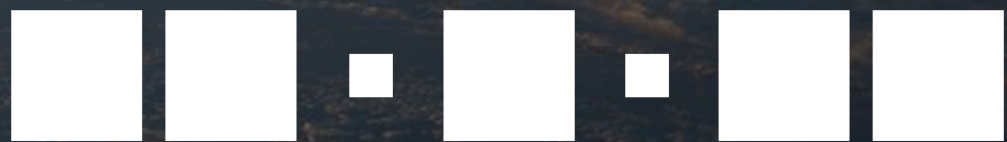

- Improving the overall participation
- Improving governance through addressing policy gaps
- Identifying ways to provide support administration tasks
- Supporting alignment with the 2021+ Strategic Plan

Progress since IGS 2022 Virtual Workshop (June 2022)

Future Work

- Capture metrics on participation in WG/PP
- Develop a process to update the GB on the status of WG/PPs
- Review categories of membership to encourage new members
- Provide a package to support WG/PP administration tasks
- Engage with IGS members to encourage participation
